

Congratulations on your new ActivEV Pulse! Use this guide for quick access to information on use and care. Refer to your full user manuals for more detailed information!

Long Term Storage

- Charge the battery system to 80%
- Turn the “Tow/Run” switch to the “Tow” position.
- Remove the key and keep it in a safe place.
- Ensure each tire is inflated to 25psi.
- Ensure battery cable connections are secure and free of corrosion
- Clean the body, seats, battery box, and chassis.
- If storing outdoors, cover the vehicle with a storage cover.
- Monitor the battery connections charge state and cables for corrosion monthly.
- Press and hold battery power button for 5 seconds to turn off.

Safe Operation Instructions

Please make sure to observe the following safe operation instructions. Ensure you are familiar with all of the controls of the vehicle prior to operating. Prior to operating the vehicle, perform checks on the battery, tires, body/chassis, brakes, parking brake, and steering. To power on your ActivEV Pulse, first ensure the battery is powered on and the RUN/OFF/EMB switch is in the RUN position. Then, insert the ignition key and turn to power the vehicle on.

Under rear seat

Under front seat

1. Multifunction Switch (Headlights, High Beams, Turn Signals, and Horn)
2. Emergency Flasher Switch
3. Forward/Reverse Shift Switch
4. USB Charging Port
5. Infotainment USB Port
6. Ignition Switch
7. 12V Power Port
8. Brake Pedal
9. Accelerator Pedal
10. Run/Off/EMB Switch
11. Brake Fluid Reservoir
12. Battery Power Button

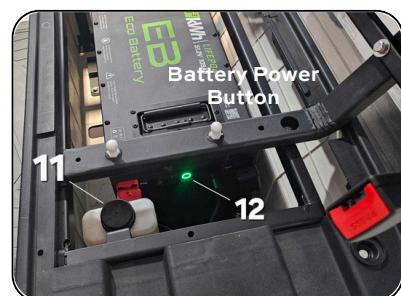

The Pulse charger is fully automatic. Once plugged in, it will begin the charging process and shut down when complete. Battery charge status during charging can be viewed by turning the cart on, connecting the Eco Battery app, or by LED status lights on the charger inside the battery compartment.

Congratulations on your new ActivEV Pulse, welcome to the family!
